*“Semester Report
on
Club Activities”*

From the Core Team - TechnoCrats GSV

This semester has been defined by a renewed sense of energy as we welcomed the B.Tech Class of 2025 into our fold. Our senior members went above and beyond, pioneering workshops and events that have set a new benchmark for the tech culture at GSV. This culminated in a rigorous recruitment process, where we were proud to select 50 exceptional 'Techno Trainees.' We are committed to guiding them as they begin their journey in Programming, Profile Development, and Robotics.

VISION FOR THE ACADEMIC YEAR

This academic year, we are enthusiastic about fostering greater synergy across our club's three core domains: Programming, Profile Development, and Robotics. Our primary objectives include:

- **Strengthening Inter-Domain Collaboration**
- **Championing Project-Based Learning**

These goals are designed to unite our members, enabling each individual to gain multidisciplinary insights and expertise.

ENGINEER'S DAY, 2025

Engineering the Future: Sustainable Transportation Quiz To mark Engineer's Day 2025, we challenged students to navigate the complexities of modern logistics and sustainability. Through a high-stakes, two-round competitive format, teams demonstrated sharp analytical reasoning and quick-fire problem-solving, bridging the gap between classroom theory and the future of green transportation.

Programming Domain: Summer 2025 Activities

IMPACT AND OUTLOOK

- Our initiatives significantly enhanced technical skills, team collaboration, and member engagement within the Programming Domain.
- These efforts laid a strong foundation for upcoming activities centered on project-based learning and cross-domain collaboration.
- Our commitment to nurturing technical excellence and promoting continuous learning remains a top priority.

CIPHER SAGA FRESHERS

The Cipher Saga Freshers Edition Over the course of one week, our newest minds were challenged with 10 mind-bending cryptic questions. The event saw incredible enthusiasm, drawing in over 80+ registrations from the fresher batch. The competitive spirit and dedication on display were truly remarkable

FRESHERS WORKSHOP PROGRAMMING DOMAIN

We hosted a Programming workshop exploring real-world applications of AI & ML. The session provided a comprehensive career roadmap, highlighted diverse career paths, and concluded with an engaging quiz. It was a fantastic opportunity for attendees to kickstart their journey into the future of technology.

Profile Development Domain : Summer 2025 Activities

KEYNOTES

- The Logic Ladder Aptitude Series aims to help students strengthen their analytical and reasoning skills for placements and exams like GATE and CAT, with new sessions uploaded once a week on Instagram.
- The Profile Development Workshop conducted for freshers was a housefull session, introducing them to elevator pitches, LinkedIn optimization, and AI tools through interactive, senior-led activities.

LOGIC LADDER APTITUDE SERIES

The Logic Ladder Aptitude Series helps students build analytical and reasoning skills for placements and exams like GATE and CAT. Uploaded weekly on Instagram, it enhances speed, accuracy, and confidence the key to boosting career readiness.

FRESHERS WORKSHOP PROFILE DEVELOPMENT DOMAIN

The Profile Development Domain's introductory workshop for freshers was a housefull success, guiding them on crafting elevator pitches, optimizing LinkedIn profiles, and using AI tools like ChatGPT and Gemini through fun, interactive activities.

Robotics Domain : Summer 2025 Activities

KEYNOTES

- Delivered a specialized CAD Workshop to empower students with critical 3D modeling and digital design skills.
- Conducted a hands-on Fresher's Workshop to introduce the new batch to the essentials of electronics and robotics assembly.
- Successfully launched the inaugural "Kickoff" Robo-Soccer tournament on November 15, 2025, sparking a spirited new tradition of competition and innovation.

BOOTING UP: FRESHER'S TRAINING & SKILLS

- **CAD Workshop:** A technical deep-dive into 3D modeling, equipping students with the essential digital design skills needed to visualize and engineer their projects.
- **Fresher's-Workshop:** A hands-on session introducing the new batch to the fundamentals of electronics and bot mechanics, providing the perfect launchpad for their robotics journey.

GEARS, GOALS, AND GLORY: THE STORY OF KICKOFF 1.0

The energy was electric on November 15, 2025, as Technocrats launched the first-ever "Kickoff" Robo-Soccer showdown. Students turned the arena into a high-tech battlefield, proving that engineering is anything but boring. From intense bot clashes to tactical plays, teams showcased incredible creativity and robotics skills amidst a roaring crowd. Edition 1.0 didn't just set a standard—it sparked a massive new campus tradition that we are already hyped to continue.
